

Terrapin Green

WHY BUILD A NEW ENERGY SMART HOME?

There are many reasons to build a new custom energy smart home in TERRAPIN GREEN rather than purchase a pre-existing house.

IT WILL BE BUILT JUST FOR YOU. You are not buying a house, you are creating a home. You will have your own custom home filled with special details and designed to fit your lifestyle. By building new, you get exactly what you want; to live how you want. Everywhere you look, you'll like what you see,

ENERGY EFFICIENCY AND ENVIRONMENTAL RESPONSIBILITY is the goal of building energy smart. This is a way for you to make a positive difference in the world. It is a fundamental change in how and why we build new. Energy smart building can result in a home that is healthier and more comfortable to live in, less expensive to operate, and built to last longer.

DESIGN FLEXIBILITY is a key component of energy smart building which allows you to design for your needs and your wants. You can take advantage of all of the universal design techniques that will allow you to age in place and live in your new custom energy smart home for as long as you wish.

QUALITY CONSTRUCTION results from energy smart building because it is all about the relationship of a home and its occupants to the world around them. It is a process of design and construction that fosters the conservation of energy and other natural resources and promotes a healthy environment. Advanced building science and technology allows you to take advantage of all of the wonderful new products available today to keep you living longer, quieter, healthier, and safer.

MAINTENANCE FREE INSIDE AND OUT CAN SIMPLIFY YOUR LIFE. Free yourself from the worrisome and expensive repairs and upkeep that an older house requires. You can take advantage of your new natural surroundings and choose no mow or low mow grass as part of your new landscape. You can choose native and non-invasive plants for your new gardens.

REMEMBER WHEN YOU BUILD ENERGY SMART what you spend in construction you can save for a lifetime in lower utility bills. You reduce your carbon footprint and you contribute to a healthier home for you and a healthier earth for all of us.

When we didn't know how to build better, we couldn't. Now we know, so how could we build any other way than ENERGY SMART!
